

Diving mask lenses

For clearest possible vision under and above water!

See as clearly as possible under water with optical glasses by Pingel Optik. Our 40 years of experience in under-water optics enables every diver to dive problemfreely and experience everything safely and reliably.

Corrective lenses are integrated in the mask of your choice to suit all optical conditions – pupillary distance (PD), centring, vision point, full use of visual field.

Distance: from €69 per lens

Precise correction for all permanent glasses wearers:

- Shortsightedness up to – 15.0 dpt.
- Farsightedness up to + 7.0 dpt.
- Astigmatism up to \pm 6.0 dpt.
- Higher values on request
- For the shortsighted who can read better without correction the lower portion of the lens can be ground off

Near: from €62.50 per lens

Correction for all wearers of reading glasses:

- Presbyopia up to + 3.5 dpt.
- Astigmatism
- Ideal for reading diver's watch and computer
- Optimum for setting camera
- Clear view of film and video camera display
- Personal requirements taken into consideration (height and size of the near portion)

Bifocal: from € 149 per lens

Correction for all 50+ divers:

- Ideal combination for distance and near vision under water
- Possible for all dioptre values
- Integrated near portion, so no perceptible segment lines at the point of transition
- Easy transition from distance to near vision
- Optimum varifocal glasses replacement

Varifocal: from € 250 per lens

Varifocal panoramic lenses:

- Stepless vision under water in all ranges
- Distance strength of between - 6.00 dpt. and + 3.00 dpt possible
- Any near addition possible
- Latest technology, so highest comfort
- Successfully tested – vision is precise as it is above water
- Blue water, dive buddies, diving computer and camera – everything at a glance
- The premium solution!

Special requirements? No problem!

We would be pleased to advise you.

Masterly handicraft

You can rely on us!

Your diving mask is produced exclusively in our own master workshop.

Decades of experience in fitting of correctional glasses onto diving masks guarantee a technically perfect and well-engineered system which will please you.

Bring us any mask (the mask of your choice).

We embed correctional glasses strictly observing all optical parameters.

The homogeneous compound of mask and optical glass withstands any diving-specific conditions.

Our store provides a wide range of masks. Of course we also are prepared to upgrade any mask in your possession.

Our family team - Sabine & Thomas Jost, Erika & Eberhard Pingel and our long-term skilled employees will gladly provide personal advice.

We deliver Europe-wide within a few business days.

For order processing use our order form, the prescription of your glasses or similar documents.

Looking forward to help you!
